

Treverk Outdoor
Cappuccino

spaces

non-urban residential

applications

interior/exterior floor coverings

ceramic surfaces

Marazzi
porcelain tile
Treverk Outdoor
15x120 cm, 30x120 cm
Cappuccino

technical characteristics

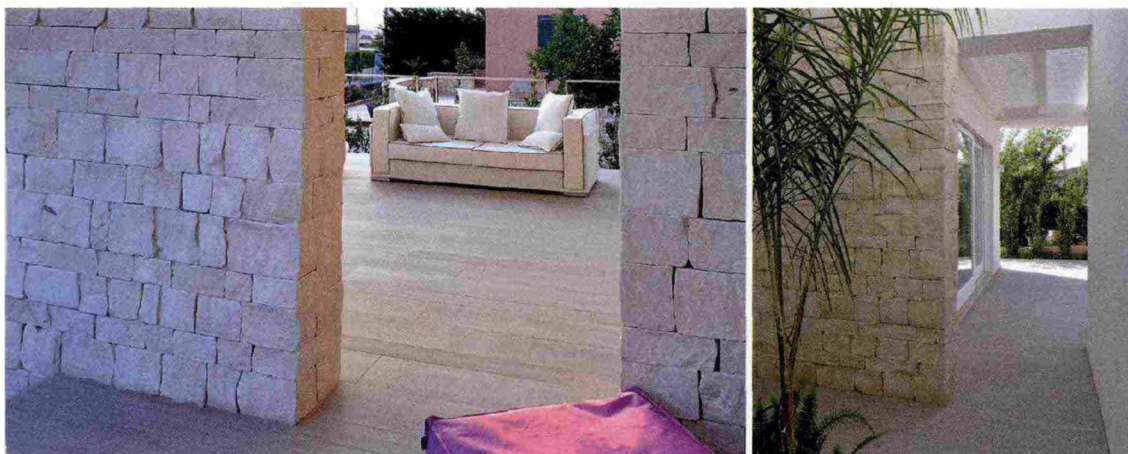

water absorption (ISO 10545-3): $\leq 0.05\%$
bending strength (ISO 10545-4): $\geq 45 \text{ N/mm}^2$
abrasion resistance (ISO 10545-6): $\leq 175 \text{ mm}^3$
chemical resistance (ISO 10545-13): ULA UHA
stain resistance (ISO 10545-14): class 5
slip resistance (DIN 51130): R10

certifications

Ecolabel, LEED, ISO 14001

sanitaryware

Globo
Stone wall-mounted WC and bidet
matt white

The architects commented: "This is an exceptional ceramic tile in terms of both performance and appearance. We chose the Cappuccino colour wood-effect finish as it reflects the sun-baked earth tone palette of the surrounding countryside and reproduces it in the interior and exterior spaces. It also harmonises well with the material texture of the natural and architectural elements and contributes to the overall luminosity. The wood look of this ceramic tile is so realistic that you feel as though you're walking on a warm wood floor. You hardly notice that it's actually a slip-resistant porcelain tile." The interior design is inspired by neo-rationalist elegance and simplicity and pursues the same vision of close integration between aesthetics and function. The interiors are organised in such a way as to ensure the maximum fluidity of movement and are largely fitted out with custom-made furniture with a white lacquered finish. This solution reduces the visual impact of the furniture while at the same time emphasising the texture and colour of the architectural materials adopted in the project. For the same reason, wood with an open-pore finish has been used for other furnishings. All in all, the house is convenient to live in and adds a note of sophistication to the urban fabric.
